

DRAGON'S MILK - WHITE

WHAT IT IS

A White Stout Barrel Aged in Oak: Smooth, Creamy, Legendary Lower ABV 6% Lighter Stout Experience

WHY WE'RE LAUNCHING NOW

Building on the Dragon's Milk launch of the #ShareALegend national campaign late in 2018, this will offer a second, more sessionable barrel-aged white stout option that still provides the enriched experience that is expected from beers which bear the Dragon's Milk name.

WHY THEY'LL LOVE IT

The White Stout style is on the rise with grassroots growth. The Stout experience is treasured and customers are looking for something new which stands out within this style. There are few, if any, year round barrel-aged options which provide a premium drinking experience. Dragon's Milk White was created from a pioneering brewing team rich with barrel aging expertise. The experience is a hazy, velvety stout when poured with a caramel and vanilla flavor profile. Fullness of flavor, lighter in experience- the best of both worlds.
